Volume 26 (2004)

Volume 26 Number 1 January 2004

Papers

1 Effects of liner stiffness for trans-tibial prosthesis: a finite element contact model
C.-C. Lin, C.-H. Chang, C.-L. Wu, K.-C. Chung and I.-C. Liao

11 Combination of finite element modeling and optimization for the study of lumbar spine biomechanics considering the 3D thorax–pelvis orientation
F. Ezquerro, A. Simón, M. Prado and A. Pérez

23 Local and regional wave speed in the aorta: effects of arterial occlusion
A.W. Khir, A. Zambanini and K.H. Parker

31 Haemodynamics and mechanics following partial left ventriculectomy: a computer modeling analysis
A. Redaelli, F. Maisano, M. Soncini, O. Alfieri and F.M. Montevecchi

43 Neural network modelling of dynamic cerebral autoregulation: assessment and comparison with established methods
R.B. Panerai, M. Chacon, R. Pereira and D.H. Evans

53 Evaluation of the efficiency of venous leg ulcer treatment with a membrane dressing
A. Ślęzak, M. Kucharzewski, A. Franek and W. Twardokęs

61 An improved method for the automatic mapping of computed tomography numbers onto finite element models
F. Taddei, A. Pancanti and M. Viceconti

71 Segmentation of magnetic resonance images using a combination of neural networks and active contour models
I. Middleton and R.I. Damper

Communication

87 Application of adaptive noise cancellation with neural-network-based fuzzy inference system for visual evoked potentials estimation
H. Yin, Y. Zeng, J. Zhang and Y. Pan

Volume 26 Number 2 March 2004

Papers

93 Finite element analysis of a femoral retrograde intramedullary nail subject to gait loading
G. Cheung, P. Zalzal, M. Bhandari, J.K. Spelt and M. Papini

109 Finite element growth analysis for the craniofacial skeleton in patients with cleft lip and palate
A. Sasaki, S. Takeshita, A.S. Publico, M.L. Moss, E. Tanaka, Y. Ishino, M. Watanabe and K. Tanne

119 Comparison of the trabecular architecture and the isostatic stress flow in the human calcaneus
A. Gefen and R. Seliktar

131 Minimal haemodynamic system model including ventricular interaction and valve dynamics
B.W. Smith, J.G. Chase, R.I. Nokes, G.M. Shaw and G. Wake

141 Quantitative assessment of osteoporosis from the tibia shaft by ultrasound techniques
T. Chen, P.-J. Chen, C.-S. Fung, C.-J. Lin and W.-J. Yao

147 Exponential taper in arteries: an exact solution of its effect on blood flow velocity waveforms and impedance
L.J. Myers and W.L. Capper

157 Distinct cell-to-fiber junctions are critical for the establishment of cardiotypical phenotype in a 3D bioartificial environment
T. Kofidis, L. Balsam, J. Bruin and R.C. Robbins

165 A structural fingertip model for simulating of the biomechanics of tactile sensation
J.Z. Wu, R.G. Dong, S. Rakheja, A.W. Schopper and W.P. Smutz
Technical note
177 Interface pressure sensor for IVRA and other biomedical applications
V. Casey, S. O'Sullivan and J.A. McEwen

Volume 26 Number 3 April 2004

Papers
183 Effects of laminectomy and facetectomy on the stability of the lumbar motion segment
K.K. Lee and E.C. Teo
193 Contamination by metallic elements released from joint prostheses
E. Chassot, J.L. Irigaray, S. Terver and G. Vanneuville
201 Aperiodic flow-induced oscillations of collapsible tubes: a critical reappraisal
C.D. Bertram, J. Timmer, T.G. Müller, T. Maiwald, M. Winterhalder and H.U. Voss
215 A novel model of the pulse decay method for measurement of local tissue blood perfusion
K. Yang and W. Liu
225 Scope of linear estimators of tidal and occluded volumes using thoracoabdominal indications of breathing movement coordination
R.K. Millard and A.M.S. Black
Technical notes
237 Specialised CT scan protocols for 3-D pre-operative planning of total hip replacement
R. Lattanzi, F. Baruaidi, C. Zannoni and M. Viceconti
247 Cyclic loading moves the peak stress to the cartilage surface in a biphasic model with isotropic solid phase properties
M.D. Warner, W.R. Taylor and S.E. Clift
251 Calibration and validation of 6 DOFs instrumented spatial linkage for biomechanical applications. A practical approach
V. Sholukha, P. Salvia, I. Hilal, V. Feipel, M. Rooze and S.V.S. Jan
261 Letter to the Editor
263 Author response
265 List of referees

Volume 26 Number 4 May 2004

Papers
269 Design and manufacture of a polyvinyl alcohol (PVA) cryogel tri-leaflet heart valve prosthesis
H. Jiang, G. Campbell, D. Boughner, W.-K. Wan and M. Quantz
279 Effect of medication in Parkinson's disease: a wavelet analysis of EMG signals
S. Strambi, B. Rossi, G. De Michele and S. Sello
291 Spectral pattern complexity analysis and the quantification of voice normality in healthy and radiotherapy patient groups
C. Moore, K. Manickam, T. Willard, S. Jones, N. Slevin and S. Shalet
303 Detection of single and clustered microcalcifications in mammograms using fractals models and neural networks
L. Bocchi, G. Coppini, J. Nori and G. Valli
313 Wavelet packet transform for R-R interval variability
K. Tanaka and A.R. Hargens
321 Improvement and automation of artificial neural networks to estimate medical outcomes
C.M. Ennett, M. Frize and E. Charette
329 Updating a 3-D vertebral body finite element model using 2-D images
A. Templeton, D. Cody and M. Liebschner
335 A cam-displacement transducer device for measuring small two-degree of freedom inter-component motion in a prosthesis
M. Twiste, S.V.S. Rithalia and L. Kenney

Communication

341 The kinetic model and simulation of blood coagulation—the kinetic influence of activated protein C
Y.H. Qiao, C.Q. Xu, Y.J. Zeng, X.H. Xu, H. Zhao and H. Xu

Technical notes

349 Bilateral symmetry of biomechanical properties in mouse femora
D.S. Margolis, Y.-H.H. Lien, L.-W. Lai and J.A. Szivek

355 A multi-station dynamic-culture force monitor system to study cell mechanobiology
K.A. Peperzak, T.W. Gilbert and J.H.-C. Wang

359 Letter to the Editor

360 Author response

361 Corrigendum

Volume 26 Number 5 June 2004

Papers

363 Optical characterization of mammalian tissues by laser reflectometry and Monte Carlo simulation
D. Kumar, R. Srinivasan and M. Singh

371 In-plane electronic speckle pattern of interference (ESPI) with optical fibre system applied to the study of the human jaw
D. Rodríguez, V. Moreno, M. Gallas, M.T. Abeleira and D. Suárez

379 Gaussian mixture models of ECoG signal features for improved detection of epileptic seizures
L. Meng, M.G. Frei, I. Osorio, G. Strang and T.Q. Nguyen

395 Does the conduction velocity distribution change along the nerve?
F. Pehlivan, N. Dalkilic and E. Kiziltan

403 LES modelling of flow in a simple airway model
X.Y. Luo, J.S. Hinton, T.T. Liew and K.K. Tan

Technical note

415 Validation of the relative 3D orientation of vertebrae reconstructed by bi-planar radiography
R. Dumas, A. Le Bras, N. Champain, M. Savidan, D. Mitton, G. Kalifa, J.-P. Steib, J.A. de Guise and W. Skalli

Communications

423 Multispectral classification techniques for terahertz pulsed imaging: an example in histopathology
E. Berry, J.W. Handley, A.J. Fitzgerald, W.J. Merchant, R.D. Boyle, N.N. Zinov'ev, R.E. Miles, J.M. Chamberlain and M.A. Smith

431 Basic characteristics of the radio imaging method for biomedical applications
I. Hieda, K.C. Nam and A. Takahashi

Volume 26 Number 6 July 2004

Papers

439 Functional evaluation of natural sensory feedback incorporated in a hand grasp neuroprosthesis
A. Inmann and M. Haugland

449 Implementation of natural sensory feedback in a portable control system for a hand grasp neuroprosthesis
A. Inmann and M. Haugland

459 Modeling and control of the agitation–sedation cycle for critical care patients
J.G. Chase, A.D. Rudge, G.M. Shaw, G.C. Wake, D. Lee, I.L. Hudson and L. Johnston

473 On the suitability of refractometry for the analysis of glucose in blood-derived fluids
K. Zirk and H. Poetzschke

483 Vibration energy absorption (VEA) in human fingers-hand-arm system
R.G. Dong, A.W. Schopper, T.W. McDowell, D.E. Welcome, J.Z. Wu, W.P. Smutz, C. Warren and S. Rakheja

493 The role of osteogenic index, octahedral shear stress and dilatational stress in the ossification of a fracture callus
T.N. Gardner, S. Mishra and L. Marks

503 Three-dimensional finite element analysis of human temporomandibular joint with and without disc displacement during jaw opening
E. Tanaka, R. del Pozo, M. Tanaka, D. Asai, M. Hirose, T. Iwabe and K. Tanne

Technical notes

513 Development of implant movement checker for determining dental implant stability
S.K. Wijaya, H. Oka, K. Saratani, T. Sumikawa and T. Kawazoe

523 Undersampling to acquire nuclear magnetic resonance images
P. Pérez and A. Santos

Communication

531 Experimental determination of compound action potential direction and propagation velocity from multi-electrode nerve cuffs
R. Rieger, J. Taylor, E. Comi, N. Donaldson, M. Russold, C.M.O. Mahony, J.A. McLaughlin, E. McAdams, A. Demosthenous and J.C. Jarvis

Volume 26 Number 7 September 2004

Papers

535 Two-layered quasi-3D finite element model of the oesophagus
D. Liao, J. Zhao, Y. Fan and H. Gregersen

545 Numerical study of nonlinear pulsatile flow in S-shaped curved arteries
A.K. Qiao, X.L. Guo, S.G. Wu, Y.J. Zeng and X.H. Xu

553 A low computational complexity algorithm for ECG signal compression
M. Blanco-Velasco, F. Cruz-Roldán, F. López-Ferreras, A. Bravo-Santos and D. Martínez-Muñoz

569 The effect of duty cycle and frequency on muscle torque production using kilohertz frequency range alternating current
A.R. Ward, V.J. Robertson and H. Ioannou

581 Factors affecting reaction times to short anterior postural disturbances
S.J. Richerson, S.G. Morstatt, R.D. Vanya, A.M. Hollister and C.J. Robinson

587 Changes in nuclear composition following cyclic compression of the intervertebral disc in an in vivo rat-tail model
C.T.S. Ching, D.H.K. Chow, F.Y.D. Yao and A.D. Holmes

Technical notes

595 Development of a cost-effective loading machine for biomechanical evaluation of mouse transgenic models
M.M. Saunders and H.J. Donahue

605 The comparison of electromyographic pattern classifications with active and passive electrodes
Y.-H. Chiou, J.-J. Luh, S.-C. Chen, J.-S. Lai and T.-S. Kuo

Communication

611 Joint kinematics and spatial–temporal parameters of gait measured by an ultrasound-based system
R.M. Kiss, L. Kocsis and Z. Knoll

621 Call for abstracts

Volume 26 Number 8 October 2004

Papers

623 Bi-directional flow sensor with a wide dynamic range for medical applications
A. Al-Salaymeh, J. Jovanović and F. Durst

639 The effects of rocker sole and SACH heel on kinematics in gait
W.-L. Wu, D. Rosenbaum and F.-C. Su

647 Comparison of compact bone failure under two different loading rates: experimental and modelling approaches
M. Pithioux, D. Subit and P. Chabrand

655 Finite element modeling of the contact interface between trans-tibial residual limb and prosthetic socket
W.C.C. Lee, M. Zhang, X. Jia and J.T.M. Cheung

663 Circumferential force production of the thumb
Z.-M. Li and D.A. Harkness

Technical notes

671 Design and fabrication of custom mandible titanium tray based on rapid prototyping
S. Singare, L. Dichen, L. Bingheng, L. Yanpu, G. Zhenyu and L. Yaxiong

677 Stiffness properties for Nucleus standard straight and contour electrode arrays
H.N. Kha, B.K. Chen, G.M. Clark and R. Jones

687 Mechanical and optical characteristics of a new fiber optical system used for cardiac contraction measurement
A. Kloppe, K. Hoeland, S. Müller, M. Hexamer, G. Nowack, A. Müge and J. Werner

695 In memoriam: Ivan Daskalov: 1933–2004
A. Wald

Volume 26 Number 9 November 2004

SPECIAL SUB-ISSUE
Neural Modelling

Guest Editor
R. Orpwood

Guest editorial

697 Neuromodelling
R. Orpwood

Special issue papers

699 Exploring structure–function relationships in neocortical networks by means of neuromodelling techniques
S. Panzeri, F. Petroni and E. Bracci

711 Neurocomputational models of the remote effects of focal brain damage
J.A. Reggia

723 Models of the subthalamic nucleus
A. Gillies and D. Willshaw

733 A biased competition based neurodynamical model of visual neglect
G. Deco and J. Zihl

REGULAR PAPERS SECTION

Papers

745 Consciousness monitoring using near-infrared spectroscopy (NIRS) during high +Gz exposures
H.C. Ryoo, H.H. Sun, B.S. Shender and L. Hrebien

755 CFD modeling of blood flow following coil embolization of aneurysms
H.S. Byun and K. Rhee

763 Detecting variability of internal carotid arterial Doppler signals by Lyapunov exponents
I. Güler and E.D. Übeyli

Communication

773 Nonlinear-analysis of human sleep EEG using detrended fluctuation analysis
J.-M. Lee, D.-J. Kim, I.-Y. Kim, K. Suk Park and S.I. Kim

Technical notes

777 Multibody dynamic simulation of knee contact mechanics
Y. Bei and B.J. Fregly

791 Total body centre of mass displacement estimated using ground reactions during transitory motor tasks: application to step ascent
M. Zok, C. Mazzà and U. Della Croce

799 Using the absorbed power method to evaluate effectiveness of vibration absorption of selected seat cushions during manual wheelchair propulsion
E.J. Wolf, M.S.R.A. Cooper, C.P. DiGiovine, M.L. Boninger and S. Guo

807 Improved tibial cutting accuracy in knee arthroplasty
W. Macdonald, J. Styf, L.V. Carlsson and C.M. Jacobsson
813 Call for papers

Volume 26 Number 10 December 2004

Papers
815 Heterogeneous nanomechanical properties of superficial and zonal regions of articular cartilage of the rabbit proximal radius condyle by atomic force microscopy
S. Tomkoria, R.V. Patel and J.J. Mao
823 Ultrasound image-based computer model of a common carotid artery with a plaque
K.W. Lee, N.B. Wood and X.Y. Xu
841 Non-invasive approach towards the in vivo estimation of 3D inter-vertebral movements: methods and preliminary results
P. Cerveri, A. Pedotti and G. Ferrigno
855 Derivative weighted active insulin control modelling and clinical trials for ICU patients
C.V. Doran, N.H. Hudson, K.T. Moorhead, J.G. Chase, G.M. Shaw and C.E. Hann
Technical notes
867 Basic behavior of the finite helical axis in a simple tooth movement simulation
K. Hayashi, H. Tanaka, K. Hikita and I. Mizoguchi
873 An investigation of the effect of electrode size and electrode location on comfort during stimulation of the gastrocnemius muscle
G.M. Lyons, G.E. Leane, M. Clarke-Moloney, J.V. O'Brien and P.A. Grace
879 A method for reduction of power line interference in the ECG
I.P. Mitov
